

Ideation Phase

Define the Problem Statements

Date	03 October 2026
Team ID	SWTID-2026-3593
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what bothers them most?	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers

Example:

I am	I'm trying to	But	Because	Which makes me feel
a traveler	book flights on my phone	it takes a long time	The website is not responsive and doesn't have a mobile version	Frustrated

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student or teacher using the	Report an IT issue by providing only	I have to rely on IT staff to	Manual classification takes time	Delays in ticket handling and uncertainty about

	school IT helpdesk.	my name and a short description.	manually identify the issue type and select the correct category and subcategory.	and can cause inconsistent categorization or human errors when many tickets are received.	whether my issue has been classified correctly.
PS-2	An IT helpdesk staff member responsible for handling school support tickets.	Process and classify incoming support requests quickly and consistently.	I need to manually review each short description, identify the issue type, and select the appropriate category and subcategory for every ticket.	The number of support requests can increase, making manual classification time-consuming, error-prone, and difficult to scale.	Extra workload and delays in handling tickets, especially when many requests are received at the same time.
