

Project Design Phase-II

Data Flow Diagram & User Stories

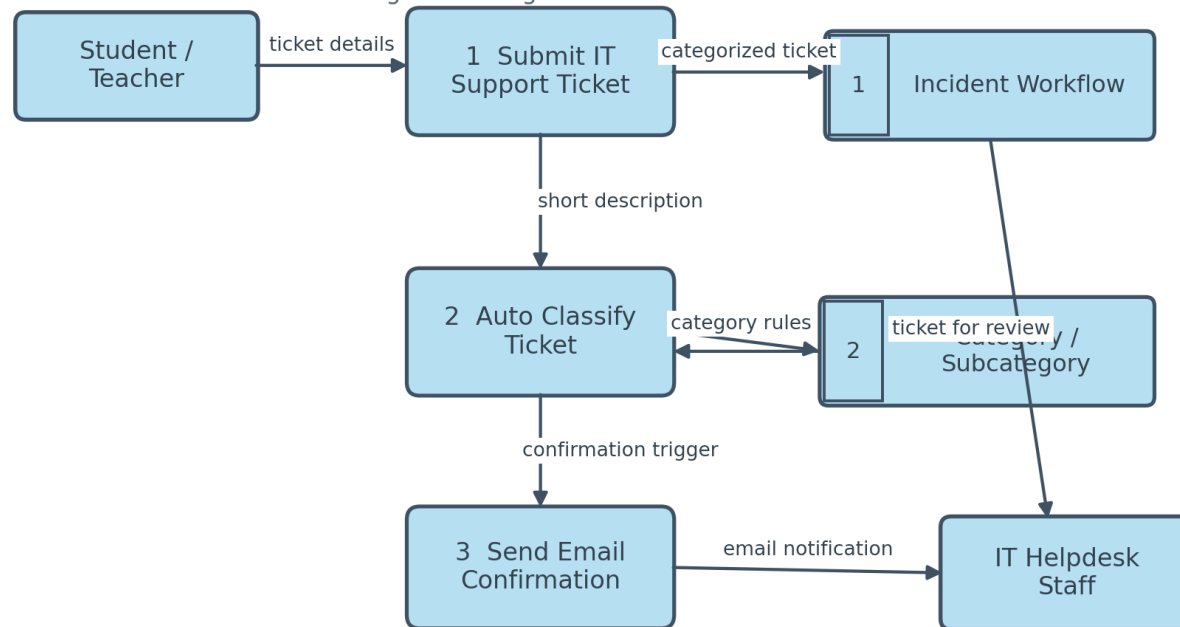

Date	03 October 2026
Team ID	SWTID-2026-3593
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. For this project, the DFD shows how a student or teacher submits an IT support request, how Flow Designer classifies the request, where the structured ticket data is stored, and how confirmation is sent to the caller.

DATA FLOW DIAGRAM — LEVEL 0

Auto Ticket Classification using Flow Designer

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Student / Teacher	Ticket Submission	USN-1	As a student or teacher, I can submit an IT support request with caller details and a short description.	Ticket is created with the required caller and issue information.	High	Sprint-1
IT Helpdesk Staff	Automatic Classification	USN-2	As IT support staff, I want new tickets to be automatically classified from the issue description.	A matching issue is classified without manual category selection.	High	Sprint-1
IT Helpdesk Staff	Category Assignment	USN-3	As IT support staff, I want the correct Category to be assigned automatically.	Wi-Fi, Projector, Password/Login and Slow/Hanging requests receive the documented categories.	High	Sprint-1
IT Helpdesk Staff	Subcategory Assignment	USN-4	As IT support staff, I want the correct Subcategory to be selected based on the Category.	Network/Wi-Fi, Hardware/Projector, Access/Forgot Password and Performance/Slow Computer are mapped correctly.	High	Sprint-1
Student / Teacher	Email Notification	USN-5	As a caller, I receive an email confirmation after my ticket is processed.	Confirmation email is sent to the Caller.	High	Sprint-1
IT Helpdesk Staff	Structured Ticket Record	USN-6	As IT support staff, I can view a standardized incident record after classification.	Number, Caller, Category, Subcategory, Short Description, Description, State, Assigned Group and Assigned To are available.	High	Sprint-2
IT Helpdesk Staff	Workflow Testing	USN-7	As IT support staff, I can test representative Wi-Fi and Projector requests.	Test requests produce the documented category/subcategory and email notification.	High	Sprint-2
Administrator	Deployment	USN-8	As an administrator, I can package the completed workflow for deployment.	The Update Set is completed and exported as XML.	Medium	Sprint-2
Administrator	Maintainability	USN-9	As an administrator, I can maintain and update the keyword-based classification flow.	The Flow Designer logic can be modified without redesigning the complete system.	Medium	Sprint-3
Administrator	Scalability	USN-10	As an administrator, I can extend the workflow for	The solution can support future assignment, SLA and	Medium	Sprint-3

			additional issue types and future automation.	predictive-intelligence extensions.		
IT Helpdesk Staff	Ticket Review	USN-11	As IT support staff, I can review classified tickets using standardized fields.	Classified tickets are stored consistently for support follow-up.	Medium	Sprint-3
Student / Teacher	Issue Confirmation	USN-12	As a caller, I can receive confirmation that my submitted request has entered the support workflow.	Email notification is generated after the workflow processes the request.	Medium	Sprint-3
