

Ideation Phase

Empathize & Discover

Date	03 October 2026
Team ID	SWTID-2026-3593
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Empathy Map Canvas

Target user: Students and teachers who use the school IT helpdesk for common technical issues such as Wi-Fi, projector, password/access, and slow-computer problems.

User Needs & Goals

- Get technical issues acknowledged quickly.
- Have the ticket categorized correctly without extra effort.
- Know that the request has been successfully submitted.
- Reduce uncertainty while waiting for IT support.

How the Solution Responds

The documented solution uses ServiceNow Flow Designer to analyze the ticket's Short Description, automatically assign Category and Subcategory, and send an email confirmation to the caller.
